BIO

Computer Science student and aspiring Full-Stack Developer with strong expertise in backend development using Fast API and Spring Boot. Experienced in building secure REST APIs with MySQL, JWT authentication, and cloud deployment using AWS, Docker, and CI/CD pipelines. Developed scalable systems including a CSAT Analytics Platform and College Fee Payment System. Interested in backend architecture, cloud-native applications, and DevOps practices.

EXPERIENCE & PROJECTS

1. **Object Detection Using Raspberry Pi** : Developed a real-time object detection system using Raspberry Pi and OpenCV to identify humans, bottles, and specific objects. Integrated a pre-trained deep learning model (YOLO/TensorFlow) for efficient object recognition in low-power environments.

2. **Online College Fees Payment System**: Full-stack web application with React Vite + Tailwind frontend and Spring Boot + MySQL backend featuring admin/student panels, JWT authentication, Razorpay payment integration, and PDF receipt generation.

3. **Multi-Document AI Assistant**: Comprehensive document processing system using React, MongoDB, Spring Boot, and Gemini API with multi-file upload (PDF/DOCX/TXT), keyword search highlighting, AI-powered Q&A, and session management with chat history restoration.

4. **Client Pulse – Customer Satisfaction (CSAT) Analytics System**: Developed a production-ready backend API using Fast API and MySQL to collect and manage customer feedback. Implemented secure JWT authentication with an admin analytics dashboard and reporting Apis. Integrated AWS S3 for screenshot storage and enabled CSV/Excel report exports. Containerized using Docker, pushed images to AWS ECR, and deployed on AWS EC2 with Nginx and CI/CD automation.

TECHNICAL SKILLS					
Languages:	Frontend Development:	Backend Development:	Databases:	Cloud and DevOps:	Development Tools:
C	HTML5/CSS3	Spring Boot	MySQL	AWS EC2	IntelliJ IDEA
Java	Tailwind CSS	Fast API	MongoDB	AWS ECR	Eclipse
Python	JavaScript (ES6+)	Django	PostgreSQL	AWS Lambda	Git/GitHub
SQL	ReactJS	Node.js		Docker	Postman
		RESTful API Design		Nginx	Visual Studio Code
		JWT Authentication		GitHub CI/CD	

INTERSHIPS

I developed a Django-based web application for managing bike rentals and ride bookings with user authentication and real-time ride tracking during my internship at IPCS Global. Additionally, I finished training at Skill Rank Company, where I built a Multi-Document AI Assistant with React, MongoDB, Spring Boot, and Gemini API. It included session management, keyword search highlighting, multi-file upload support, and AI-powered Q&A.

ACADEMIC BACKGROUND

Bachelor of Technology in Computer Science and Business Systems Francis Xavier Engineering College	2022 - 2026
--	--------------------

INTERESTS

- Backend System Design
- Cloud Computing & Deployment
- DevOps & Automation
- AI & Machine Learning
- Learning New Technologies

LANGUAGES

- English
- Tamil
